

CAREER PATH SPOTLIGHT

Repair Technician

Repair Technicians perform in-house repairs on customer equipment, restoring rotary tables, live tools, and other components to peak condition. **As a Repair Technician, you'll sharpen your mechanical abilities, work hands-on with specialized equipment, and take pride in restoring tools that power modern manufacturing.**

Why This Career Matters

- ▶ Brings high-value customer equipment back to life.
- ▶ Builds deep understanding of machine components and precision mechanisms.
- ▶ Offers hands-on repair experience in a shop environment.

What You'll Do

- ▶ Disassemble, inspect, clean, rebuild, and test equipment.
- ▶ Maintain safe and organized workspaces.
- ▶ Document repairs and complete required data entry.

What to Expect

- ▶ Regular exposure to coolant, solvents, confined spaces, and noise.
- ▶ Frequent kneeling, bending, grasping, and other physical tasks.
- ▶ Occasional lifting up to 35 lbs.

Who Thrives in This Role?

- ▶ People who love understanding how things work.
- ▶ Independent workers with strong attention to detail.
- ▶ Those who communicate positively with customers and coworkers.

GREAT FIT FOR STUDENTS STUDYING:

- ▶ Mechatronics
- ▶ Industrial maintenance
- ▶ Mechanical systems technology
