FMB Collet Ordering Guide

SHK - Small bore pin on and set screw collets used for pusher sizes ranging from 5mm to 22mm. The 5 and 7mm versions are fastened by thread; the 10 through 22mm versions utilize a pin to secure the collets to the rotating unit of the pusher.

SHT Collet - Medium bore set screw collets used for pusher sizes ranging from 25mm through 38mm.

SHTG Collet - A variant of the SHT collet. This set screw mounted is used for large bore collets for pushers ranging from 42 through 80mm. The variation amounts to the inclusion of a spring to provide increased tensioning of the collet fingers.

Example: FCOL + 32 + 1900 = FCOL321900

Part Class (FMB Collet)	Outside Dia. (32mm)	Inside Dia. (19.00mm)
